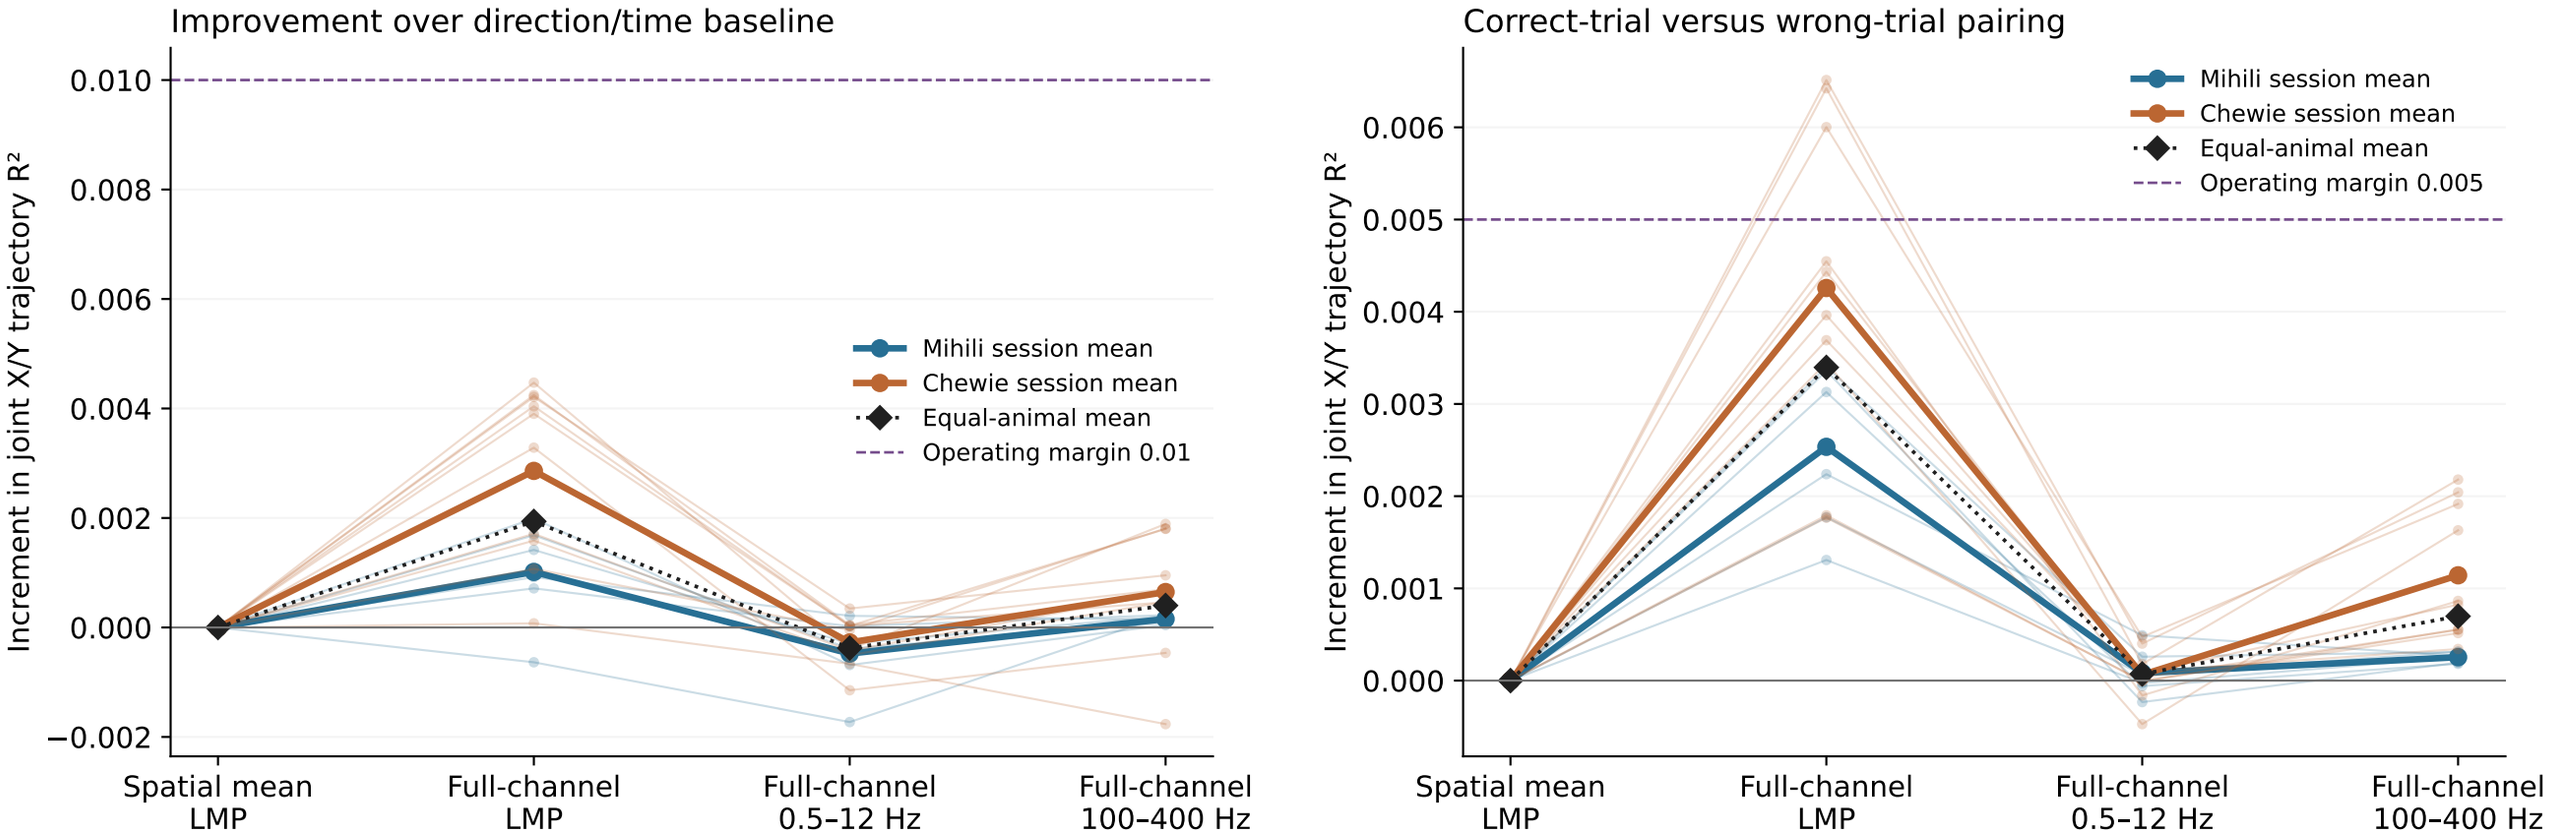
EP05 · Do electrode contrasts preserve useful trial information?

Exposed development only · 16 sessions, 2 animals · held-direction fits and outer-session penalty selection



Faint lines: individual sessions. Solid lines: within-animal session means. Diamonds: equal weight to the two animals.

Feature widths differ; no matched-capacity spectral claim. Operating margins alone cannot promote a candidate. No confidence intervals.

Source: completed primary_reference_summary_attempt001 and primary_multichannel_summary_attempt001; no new fits or source reads.
