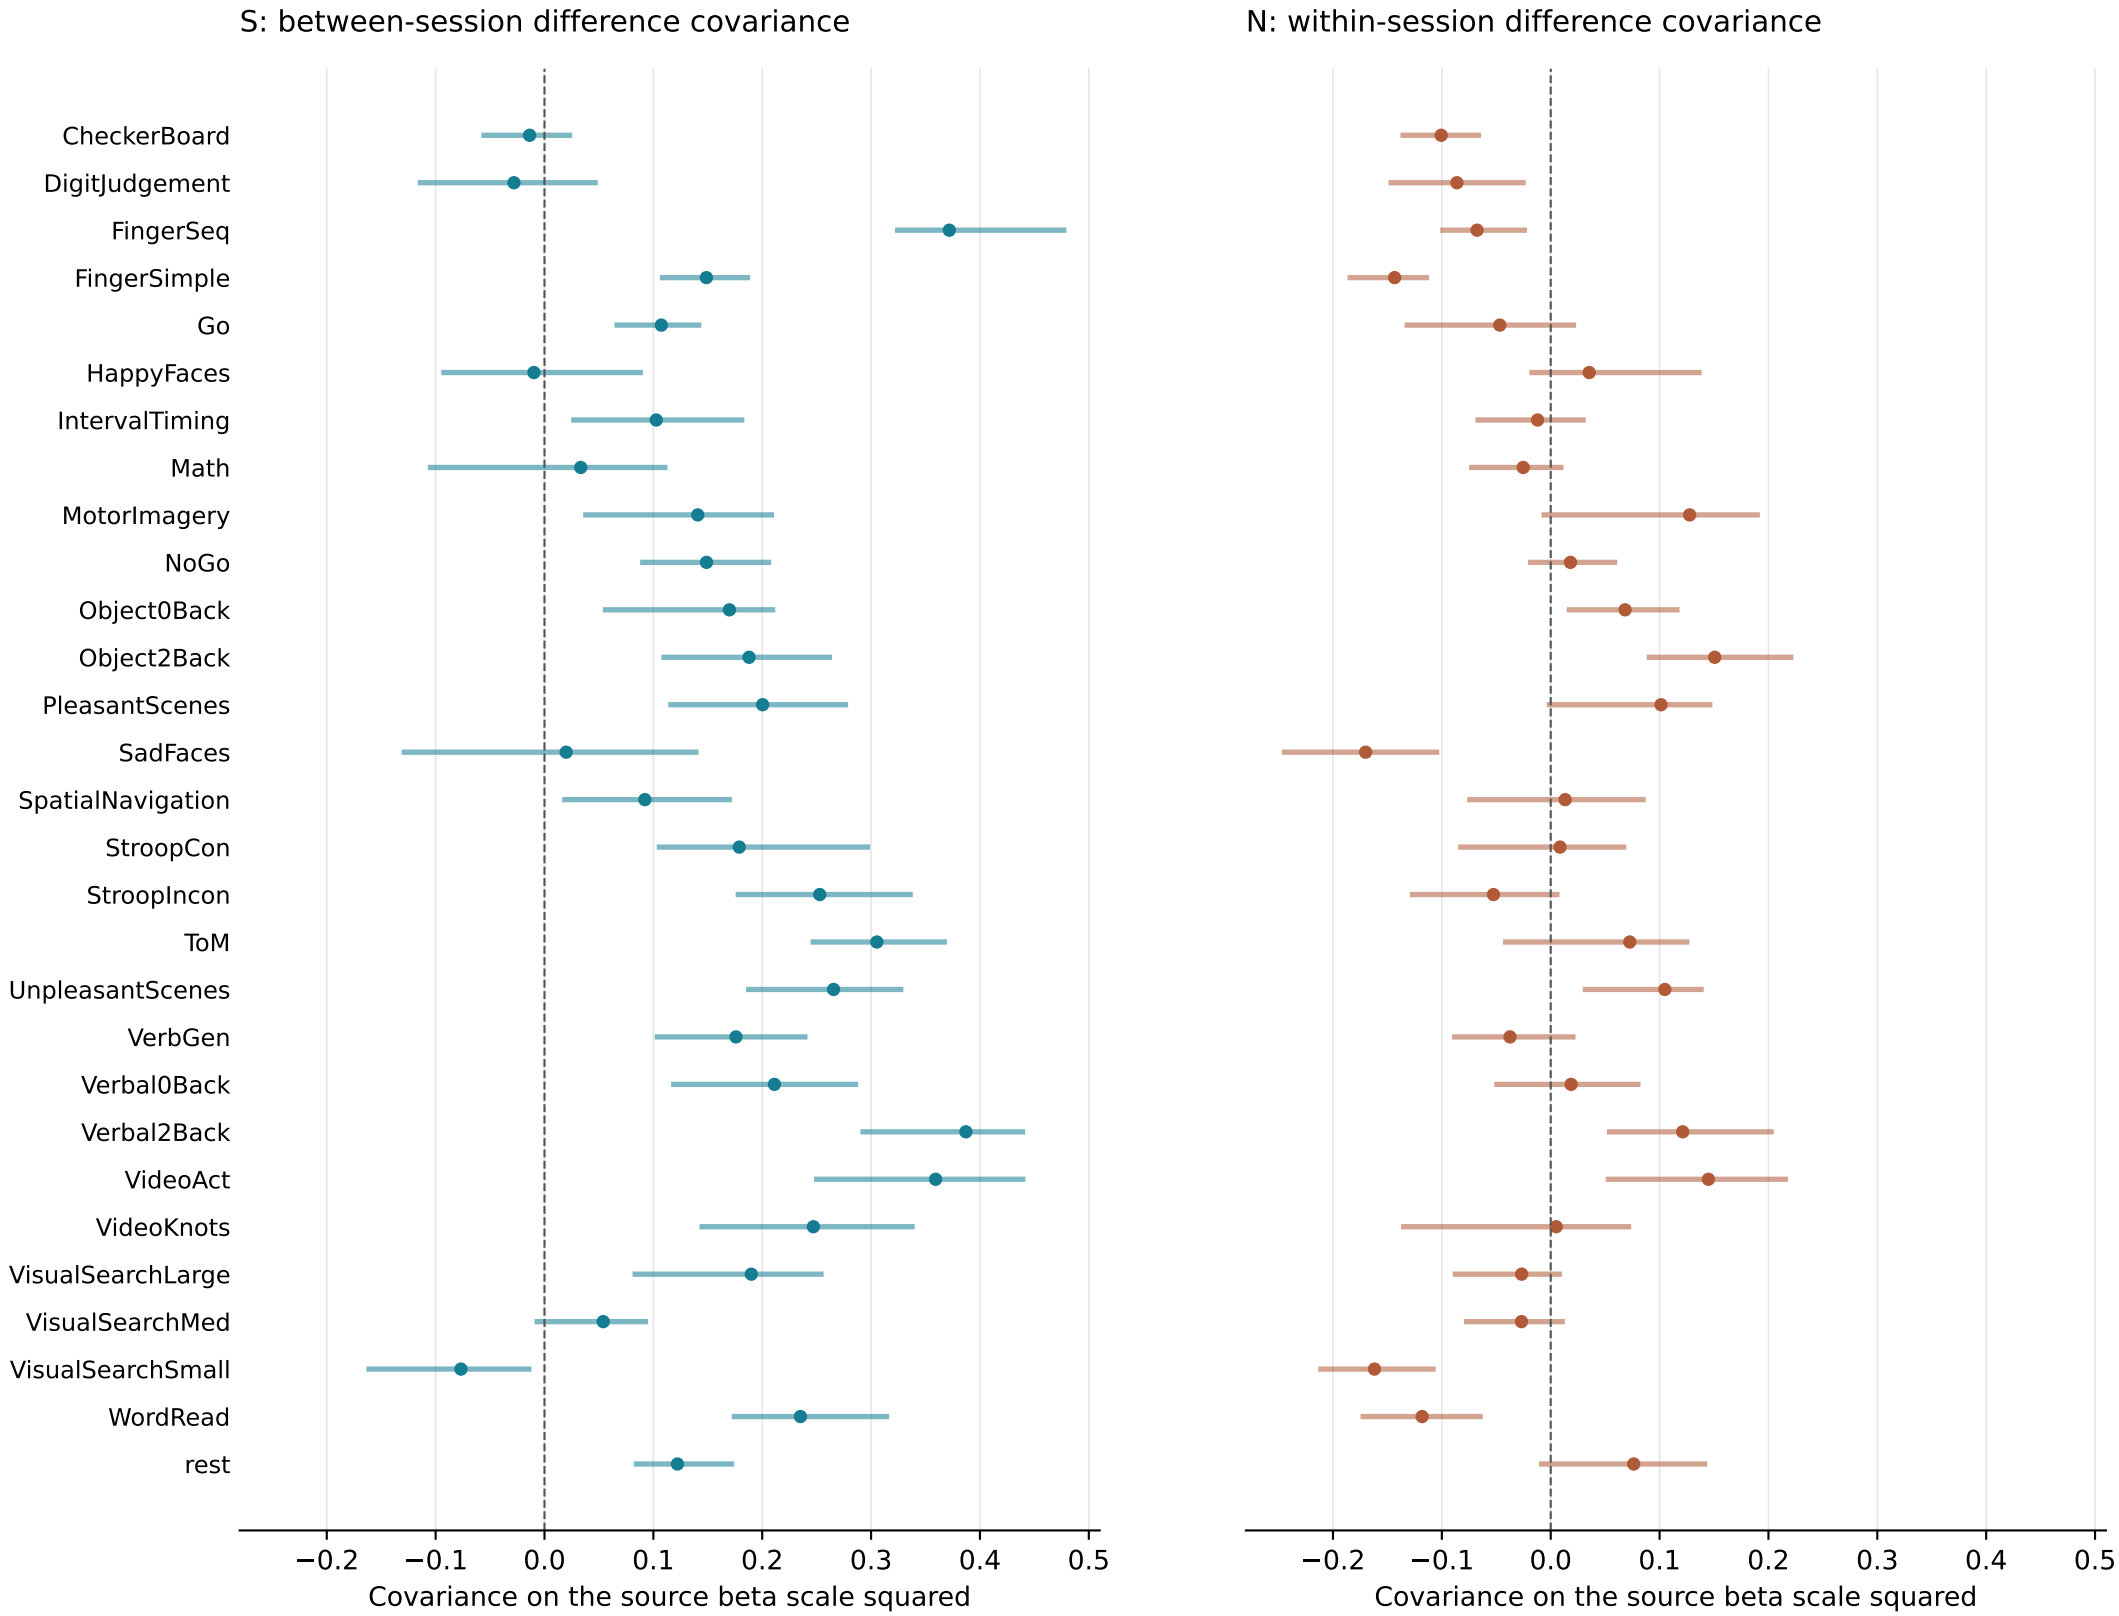
EP15 | Real Task-A partition diagnostic

12 development participants · 29 conditions · 208 fixed cerebellar locations



Dots: full-cohort estimates. Lines: range after deleting each participant; these are not confidence intervals.
P1–P4 contain runs 1–4, 5–8, 9–12, 13–16. S = U(P1−P3, P2−P4); N = U(P1−P2, P3−P4).
Session interpretation follows documented run ordering. Physiology and shared nuisance are not separated.
Source: task_a_error_support/attempt002/diagnostic.json. Task B and audit data were not opened.
